Rahul Maheshwari

React | Node | Python | Django

Gurgaon, Haryana, India

Summary

I am a Senior Software Engineer at Tower Research Capital, a leading global high-frequency trading firm, where I work with the Risk Division to build and maintain robust web applications using Python, Django, ReactJS, and NodeJS. I have over eight years of experience in the software development industry, with a strong background in web development, designing, planning, and execution.

In my previous roles, I have gained hands-on experience in various JavaScript frameworks, such as AngularJS, Redux, BackboneJS, and Angular 2, as well as HTML, CSS, C, and unit testing tools and techniques. I have worked in agile and fast-paced environments, with continuous integration and deployment, and in different domains, such as health, retail, e-commerce, and finance. I have also developed trading apps in the forex domain for RBS, one of the largest banking and financial services companies in the world. I am a team player, with strong analytical and problem-solving skills, and a keen interest in algorithmic problems. I enjoy solving critical software challenges with simple and elegant approaches that enhance user experience and satisfaction.
